

Anaphylaxis & Allergy Training for Schools & Carers

This online training course has been designed to be used by anyone who cares for children, including those in schools, parents, guardians, youth workers and childminders. Our training will provide you with a step-by-step emergency procedure to follow in response to an anaphylactic shock.

In just 40 minutes you will learn about what Individual Healthcare Plans are, the different types of allergies and how they are caused, what anaphylaxis is, school policies and responsibilities and the impact that these allergies can have on a child.

COURSE CONTENTS

The course covers the following five elements:

- Allergies
- Allergy Management
- Anaphylaxis
- School Policies and Responsibilities
- The Impact of Allergies on Children
