

# Asthma Awareness for Schools & Carers

This online training course has been designed to be used by anyone who cares for children that have asthma. This course will provide an overview of the common types of inhalers and how to treat infants, juniors and teens.

This course will look at what asthma is, the triggers and symptoms of asthma, the different kinds of medication, what to do when a child has an asthma attack and what your schools' responsibilities are.

## COURSE CONTENTS

The course covers the following five elements:

- What is asthma
- Triggers and Symptoms of Asthma
- Medication
- Asthma Attacks
- School Responsibilities
